

TITUS GRD REVIT FILES NOW AVAILABLE!

What is Revit?

Revit is a building information modeling software developed by Autodesk specifically for mechanical, electrical and plumbing designers. It is the next generation of drafting that allows for a 3-dimensional view of your project providing for ease of coordination between the architect, MEP engineers and contractors.

We are pleased to announce that Titus, Loren Cook and Ruskin have jumped on board and currently offer complete and functional Revit models of their products online.

Titus – Revit drawings are now available for Grilles & Diffusers! The most commonly used models are online now, please check back for updates as additional models are added. Of course Revit drawings are still available for VAV Terminal units and Fan Powered Boxes, including the Phantom – ultra quiet fan powered box and the new line of Underfloor terminals. Options for hot water, electric heat, left/right hand unit configurations and various voltages are all available.

Please visit www.titus-hvac.com and click on “Software” and the sub-category “Revit” or [click here](#) to go directly to the GRD Revit files.

Note: Titus has a “group download” function available to make it easier to download multiple files at once.

Loren Cook – Revit drawings are now available for all Cook ventilation products ranging from small ceiling mounted fans to the Vari-Plume lab exhaust fan! Each family of drawings includes connector elements for ductwork, electrical controls and mounting. User defined attributes are included for airflow, static pressure, RPM, horsepower, voltage, phase, etc.

Please visit www.lorencook.com and click on “Design Tools” or follow the above link.

Note: Please set up a Cook account for complete access.

Ruskin – Revit drawings are now available for almost all Ruskin products! Airflow measuring stations, control dampers, ERV's, fire and smoke dampers, industrial dampers, louvers, even architectural screens and sun shades!

Please visit www.Ruskin.com and click on “Revit Models” at the top of the home page or follow the above link.
