

CAN SAVE YOU TIME AND \$\$\$!

May 2011

Air Products Equipment Company is now the local representative for Lindab! We proudly add Lindab to our line of quality products. By the end of this month, we will have in stock Lindab's single wall pipe, fittings and registers for your convenience!

About Lindab

Lindab is an international company, which develops, manufactures, and markets sheet metal products and system solutions for the HVAC industry. As a yellow label union manufacturer of spiral duct and fittings, Lindab is a proud partner of the Sheet Metal Worker's International Association (SMWIA). Operating from three facilities in the USA, Portsmouth, Virginia serves as a main manufacturing center and the USA headquarters.

What is Lindab Safe?

This is the product for those who desire a cost-effective duct system that will create a quieter, safer and cleaner environment. Lindab Safe installs up to 25% faster, reduces overall installation costs, comes with a ten-year warranty and is guaranteed to outperform the tightest standard SMACNA and ASHRAE address, Leakage Class 3.

Superior performance is achieved through Lindab Safe's patented double-lipped gaskets that prevent

toughest tolerances and only high-grade sheet metal is utilized. Furthermore, mass production and in-line quality control make Lindab Safe the most economical duct system in the market.

Benefits of the Lindab Safe® Air Duct System

- Complete line of self-sealing spiral duct and fittings from 3" - 60" diameter
- Meets SMACNA Leakage Class 3 performance
- Factory installed double-lipped gasket
- Fast and easy installation
- Adjustability – fittings can be rotated 360° during installation
- Green – no VOC off gassing
- Rolled edges on fittings and corrugations on duct add strength and reduce risk of injury
- May be installed in all weather conditions - temperature rated for -20 °F to +212 °F
- Manufactured to strict published manufacturing tolerances
- Built in accordance with 2005 SMACNA HVAC Duct Construction Standards for +10" WG
- Gasket material UL classified (ASTM Std. E84-91a)
 - Flame spread: 0
 - Smoke developed: 5
